PROJECTS

PANTRY PERFECT

A responsive CRUD application that allows a user to track the quantity of ingredients that they regularly use in recipes to leverage how responsible they are to the money they spend on groceries.

- Built with React
- Styled with Semantic UI
- Supported by a flat data-structure in JSON
- Utilized Charts.js for stats
- Implemented Tilt.js for style

USE BY

A mobile responsive CRUD web application that allows a user to track food expiration dates and calculate money waste to help cut down on food waste and its harmful environmental effects.

- A winning pitch from the Nash Hack Weekathon and envision by UI/UX guru Angie Renfro
- I was tech team lead for the 48 hour build
- Build in React styled with Semantic UI
- Supported by a flat data-structure in JSON
- Winner of the People's Choice Top Banana Award

EDUCATION HISTORY

NASHVILLE SOFTWARE SCHOOL
 Full Stack Bootcamp | July 2018 - Present

MIDDLE TENNESSEE STATE UNIVERSITY
 English Writing | 2007 - 2010

EXPERIENCE

FULL STACK SOFTWARE DEVELOPER | Nashville Software School | 2018

Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving, with the final half of the program executed in a simulated company environment with Scrum methodology.

- Hands on application of OOP fundamentals through group and individual projects reflecting real world business problems
- Source code version control with Git/GitHub and Project Managing/tracking with Github Projects
- JavaScript fundamentals leveraging DRY, modular, readable code and reusable components
- Using React, HTML, CSS and jQuery, built browser-based single page applications
- Task Automation with Grunt: Linting with ESLint, module bundling with Browserify
- Experience using Bootstrap, Semantic UI, Bulma and CSS to style web applications
- Deployed applications through GitHub Pages and Heroku
- Leveraged VirtualBox for virtualizing a Windows environment
- Used Visual Studio and SSMS 17 to write a ASP.NET MVC WebAPI.
- Learned unit testing to write testing suites for code
- Application design through white boarding dependencies and building ERD's
- Created and modified database design/content using SQL and ORM tooling (Dapper), including exposure and experience with migrations

OPERATIONS TECHNICIAN | General Motors | 2016 - 2018

Intense, fast-paced factory environment located in Spring Hill, TN where a typical shift can produce between 350 -500+ crossover vehicles, the Cadillac XT-5 and GMC Acadia

- Time Management via rotating between 6 jobs, each containing 20+ tasks to be completed in repetition every 64 seconds, up to and over 500 times a shift
- Trained a team of 6 members on new jobs and job changes
- Quality Control by completing delicate repairs to avoid added cost and by completing quality reviews to ensure non-defective product release.

CUSTOMER ADVOCATE | Verizon Wireless | 2015 - 2016

High volume, intensely competitive call center environment located in Franklin, TN where customer service representatives fielded support calls from all over the country

- Time Management via intense grading metrics to deliver award winning customer service
- Multitasking via using numerous programs to manage call flow (Cisco), customer accounts, sales, technical support, and business to business support
